Letters of Transmittal

Saskatchewan

Minister of Rural Affairs

Legislative Building
Regina, Canada
S4S 0B3

The Honourable C. Irwin McIntosh,
Lieutenant Governor,
Province of Saskatchewan

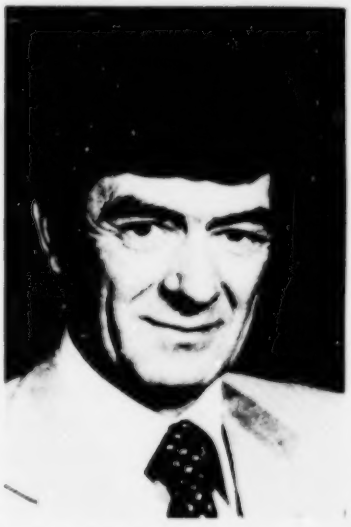
Sir:

I have the honour of submitting the annual report of the Department of Rural Affairs for the year ending March 31, 1982.

Respectfully submitted,

Bob Pickering

Bob Pickering,
Minister of Rural Affairs.



Honourable Bob Pickering,
Minister of Rural Affairs

D. V. Gilewich,
Acting Deputy Minister of Rural Affairs.

Saskatchewan Rural Affairs

Deputy Minister

2240 Albert Street
Regina, Canada
S4P 3V7

The Honourable Bob Pickering,
Minister of Rural Affairs,
Regina, Saskatchewan

Sir:

I have the honour of submitting the annual report of the Department of Rural Affairs for the year ending March 31, 1982.

Respectfully submitted,

D. V. Gilewich

D. V. Gilewich,
Acting Deputy Minister of Rural Affairs.

Objectives

Primary Objectives

- To provide financial and administrative services and programs to rural municipalities in the completion of designated programs to improve the quality of life for rural residents;
- To ensure the strength of local government;
- To respond to the recommendations and directions as designated by the Saskatchewan Association of Rural Municipalities and rural residents.

Functions:

Designated Road Program

- To provide financial and technical assistance
- To ensure roadway standards
- To ensure traffic safety standards

Community Planning

- To assist rural municipalities with their community planning and resource management endeavours
- To encourage appropriate municipal land use and resource management practices within rural Saskatchewan
- To administer "The Planning and Development Act" through the process of reviewing development plans, zoning bylaws and subdivision proposals pertaining to Rural Municipalities
- To administer the Abandoned Railway Right-of-Way Land Use Program
- To represent Rural Affairs in the Environment Impact Assessment review process
- To review rural-urban annexation proposals from a Rural Affairs prospective

Municipal Management and Finance

- To provide an advisory and consultative service
- To draft proposed legislative amendments
- To provide statistical reports
- To provide on-the-job training for R.M. employees
- To review financial statements, budgets and accounting procedures

Revenue Sharing

- To provide additional funding through annual grants to rural municipalities to ensure fiscal viability

Planning and Research

- To provide road planning services
- To provide input for program and policy development to best serve the interests of rural municipalities
- To determine the unconditional revenue sharing funds to rural municipalities and organized hamlets
- To conduct departmental research on policies and programs effecting rural municipalities and rural residents
- To administer the traffic safety program that provides financial and technical assistance to rural municipalities

Bridge Program

- To provide financial and technical assistance for the construction and maintenance of bridge facilities
- To maintain an inventory of bridges and the condition of bridges in Rural Municipalities

Ferry Program

- To operate fifteen ferry crossings free of charge as part of traffic management and transportation access in the municipalities

Municipal Employees' Superannuation

- To administer a program which provides long term income security for participating employees and their dependents

Municipal Grants

Rural Revenue Sharing

Under the province's revenue sharing program, Saskatchewan Rural Affairs distributes annual grants to R.M.'s. The total money available is determined by a formula which reflects the strength of the provincial economy and allows all municipalities to benefit from Saskatchewan's prosperity. In 1981-82 rural municipalities shared over $38 million for specific projects and locally determined programs.

Unconditional Grants

Grants totalling $13,341,940 were paid to rural municipalities on an unconditional basis according to the established formula.

Conditional Grants

Conditional grants for rural municipalities were paid out during the year under review for the following purposes:

Primary Grid	$ 4,398,560
Main Farm Access Roads	13,023,280
Bridges	2,699,990
Maintenance	1,349,410
Industrial Access Roads	526,460
Resort Roads	254,060
Traffic Safety	18,040
Traffic Counts	149,140
Regional Park Roads	764,410
Indian Access Roads	128,580
Ambulance Service	876,190
Timber Roads	61,110
Fire	216,940
Recreation	192,390
Total	**$24,658,560**

Inter-Municipal Programs

Municipalities which agree to offer common road ambulance, recreation and fire protection services to their residents are eligible for inter-municipal revenue sharing grants.

Two or more neighbouring municipalities may qualify through a formal agreement, and in some cases an association is necessary to administer the services. It is up to an individual municipality to initiate the agreement and to work out the terms and conditions.

Assistance to New Rural Municipalities (former L.I.D.'s)

This grant program assists recently formed rural municipalities (former Local Improvement Districts) in maintaining a desirable level of service, comparable to adjoining rural municipalities. The objective is to provide grants on a five-year declining basis from the year each Local Improvement District attained self-government. During the year under review, $233,020 was paid out for this purpose.

Assistance for Construction of Roads in Indian Reserves

This program provides for the construction of designated roads on Indian Reserves. Under agreement with the Federal Government the Province recovers 80% of construction costs. Grants in the amount of $83,350 were paid during 1981-82.

Drafting Services

The main function of the branch is to provide cartography, graphic and drafting services to all branches of Rural Affairs. Map sales and services are also provided to outside agencies and the general public.

During the 1981-82 fiscal year the Drafting Services branch embarked on a four-year updating program of rural inventory maps. When completed these maps will have additional pertinent information providing improved clarity and will be of greater assistance to the rural traveller.

The following is a list of Drafting Service achievements for the year under review:

- 88 rural inventory maps were updated and put into a new format.
- 14 hamlet plans were compiled for organized hamlet status.
- 17 R.M. zoning maps were compiled showing land use criterias.
- 299 R.M. project maps were revised showing the 1435 km of new construction.
- 28 overlays for the 1981 Saskatchewan Grid Road map were updated and 52,000 free copies distributed.
- Various pictorial and information displays were produced for district meetings and the S.A.R.M. convention.

Board of Examiners

The Board of Examiners (Rural), appointed under the provisions of The Department of Rural Affairs Act, is responsible for the issuance of certificates of qualification to secretary-treasurers of rural municipalities and to other qualifying individuals. The Board consists of one staff member of the Department who serves as chairman, one representative from the Saskatchewan Association of Rural Municipalities and one representative from the Rural Municipal Secretary-Treasurers Association.

Type of Certificate	Number Issued — 1981-82
Rural Class "C"	26
Rural Class "A"	26
Rural "Superior A"	5

Communications

Provides information materials to local governments, specific interest organizations and the general public on department policies, programs, objectives and activities.

During the 1981-82 fiscal year, the Communications Branch undertook public information activities to create awareness of Rural Affairs policies, programs and acitivities.

The Communications Branch responded to numerous requests for information and prepared many news releases, both regionalized and general distribution, for distribution to the printed and electronic media. Many articles for specific interest publications were also arranged for or prepared by the Branch.

The publication of material by the Department is arranged for, designed and produced by the Branch. In 1981-82, the Branch produced a department brochure, designed specific areas of the annual grid road map and was involved at various levels in the production of many other materials.

In 1981-82, the Department of Rural Affairs numbered and signed the primary grid roads in the province. The Branch arranged for advertising and public awareness of this new numbering program.

The Communications Branch worked closely with the Drafting Branch in design and production of a department display that was used at several functions, both in the local government and general public areas.

The Director of Communications maintains a close liaison with various groups throughout Saskatchewan, such as exhibition associations, news media associations and other interest and community groups. Through these relationships, the Branch has established a valuable network for public awareness information distribution.

The initial design and production of a rural traffic safety program was initiated in 1981-82. The completion and use of the program and display will take place in the next fiscal year.

Municipal Employees' Superannuation Plan

Composition of Commission

The Commission administrating the provisions of The Municipal Employees' Superannuation Act is comprised of nine members:

- Chairman — Appointed by the Lieutenant Governor in Council
- Member representing Urban Employees — Appointed by the Minister of Rural Affairs
- Representative of Policemen and Firefighters — Appointed by the Minister of Rural Affairs
- Six other members named by their respective associations namely:
  - The Saskatchewan Urban Municipalities Association
  - The Saskatchewan School Trustees' Association
  - The Saskatchewan Association of Rural Municipalities
  - The Rural Municipal Secretary-Treasurers Association
  - The Associaton of School Business Officials
  - The Association of Community Colleges

Participants in Plan

- Employer Members — (approximately 700)
  - some cities
  - towns and villages
  - rural municipalities
  - school divisions
  - community colleges
  - regional public libraries
  - various associations, e.g. SUMA, SARM, etc.
  - Municipal Hail Insurance Corporation
- Employee Members — (approximately 5,000)
  - city and town administrators
  - policemen and firefighters
  - secretary-treasurers
  - teacher aides
  - motor patrol operators
  - caretakers
  - school bus drivers

Growth of Plan
(Millions of Dollars)

	1980	1981
Investment Holdings — amortized cost —	51.7	63.4
Contributions to Plan — Employee and Employer —	6.9	8.1
Superannuation Payments — Formula benefits and annuities —	.682	1.010

Since the unit formula benefit plan which made it compulsory for municipal employees to contribute did not come into existence until July 1, 1973, the ratio of superannuated members to contributing members is very low. This being the case, the current pension costs are only a small percentage of current contributions.

Solvency

The Municipal Employees' Superannuation Plan is fully funded by contributing municipal employees and their employers; however, the Provincial Government pays all administration expenses incurred in the administration of The Municipal Employees' Superannuation Act. An actuarial study completed late in 1981 indicates that the fund is in excellent financial condition.

Annual Report

The Municipal Employees' Superannuation Commission prepares its own annual report each year which reflects all the details of the plan's activities, and includes audited financial statements.

Community Planning Services

The Community Planning Services Branch assists the province's 299 rural municipalities in their community planning endeavours. These include the preparation and establishment of development policies and the consideration of development proposals. The Planning and Development Act provides for the adoption of municipal development plans and zoning bylaws. Municipalities may co-operate with adjoining local governments in their community planning activities through district planning agreements.

By the end of the 1981-82 fiscal year there were:

- seventeen (17) inter-municipal planning districts.
- two (2) rural municipal development plans in effect.
- ninety (90) rural local governments with land use (zoning) controls.

Administrative responsibilities of the Branch include The Planning and Development Act and The Municipal Expropriation Act as they pertain to rural local governments. The Branch represents Rural Affairs in the Environmental Impact Assessment review process. Liaison with Urban Affairs is maintained with respect to municipal boundary alterations; regional, inter-municipal and lake management planning; and the Qu'Appelle Special Planning Area program, through an inter-agency policy committee and regular referrals.

Branch staff assists local advisory committees responsible for policies respecting the management and disposal of thirty-five (35) abandoned railway rights-of-way.

During 1981-82, the Branch assisted rural municipalities with various community planning, land use and resource management issues including agricultural land preservation, urban fringe and lakeshore development problems. In this regard there were:

- grants totalling $52,000 for two lake management plans.
- fourteen (14) new zoning bylaws adopted.
- eighteen (18) zoning bylaws amended.
- forty (40) rural municipalities in the process of adopting land use controls.

In liaising with other agencies, the Branch handled the Rural Affairs review with respect to:

- thirty-six (36) Environmental Impact Assessments.
- thirty-eight (38) municipal boundary alterations.
- thirty-nine (39) subdivision referrals from Urban Affairs.

Statutory Branch subdivision related reviews involved:

- 1,344 subdivision proposals.
- 832 subdivision approvals.
- seven (7) subdivisions refused.
- 413 subdivision applications active.
- ninety-two (92) subdivision application files closed.
- fifty-one (51) subdivision re-approvals.
- fourteen (14) municipal expropriations.
- one (1) subdivision replot.
- eighteen (18) Public Reserve status changes.

The responsibilities of the Branch were carried out from offices in Regina and Saskatoon. Branch staff, including the Director, was comprised of four professional planners and five non-professionals. To supplement the permanent staff one technician and three secretaries were hired on a temporary basis.

Requests by rural municipalities for planning assistance continues to be significant, especially where urban fringe problems are being faced. The aggregate statutory workload increased somewhat in 1981-82 over the previous year, particularly with respect to new zoning bylaws, annexations and environmental impact assessment reviews.

Planning and Research

During the year under review, the Planning and Research Branch was responsible for designating and co-ordinating road system planning for rural municipalities, conducting research into rural issues, development and transportation, distribution of unconditional revenue sharing funds and provided research, technical and financial assistance to rural municipalities to reduce the social and economic loss due to municipal traffic accidents.

Road Planning

During the 1981-82 fiscal year, applications for roadway changes totalled 1 180 km in 128 rural municipalities and several maintenance areas. These locations were examined and 165 kilometres of roadway were classified into various road assistance programs. The designated road system in 1981-82 consisted of 53 000 kilometres thereby committing the Government to funding approximately 1/3 of Saskatchewan's municipal road system. To facilitate road planning, traffic studies were carried out on 3 000 kilometres of road by our staff. Origin-destination and/or vehicle classification studies were carried out at ten locations.

Summer staff also conducted inventory in 83 rural municipalities to update our road inventory and planning maps.

The rural road inventory provides an essential information base of existing roads and standards, farm homes, industries, resort developments, etc. that is required in planning and assessing the roadway needs in each rural municipality. In addition, the road class information is one of the input factors in the calculation of the unconditional revenue sharing grant.

Under Branch supervision consulting engineers conducted traffic studies in 65 rural municipalities.

The traffic study data forms the basis for designating roadways eligible for provincial assistance, funding of grants and road design standards.

The traffic data is in regular demand by various government agencies and rural municipalities which rely on the data to establish their construction and maintenance priorities.

The Branch was responsible for setting up Timber Haul Road Maintenance agreements in four rural municipalities whereby the Department of Rural Affairs pays 100 percent of the maintenance cost on the designated haul routes up to a maximum of 3.1¢/cord/km. The maintenance agreements compensate rural municipalities for over-weight hauling of timber.

Reduced speed zone requests from eight rural municipalities were assessed and recommendations were provided to the Highway Traffic Board.

Research

In the fiscal year 1981-82, the focus of the research division was directed at ensuring department programs reflected the changing needs of rural municipalities.

Major research responsibilities included:

- Review and development of rural programs.
- On-going research into rural revenue sharing to ensure equitable distribution of conditional and unconditional funding.
- Research into municipal financing.
- Monitoring new developments in rural local government that included reviewing any legislation having an impact on rural municipalities.

Research studies undertaken during the year included such projects as:

- The development of a procedure for the computerization of road statistics that includes financial information about road construction throughout the Province.
- Assessing the impact of increased grain movement on the rural road system.
- Documenting the effect of Saskatchewan Treaty Land Entitlement Selections on municipal revenues.
- Reviewing provincial policy on grants-in-lieu of property tax payments to municipal governments.
- Analyzing population trends relating to rural area development.
- Reviewing and assessing an industrial road policy.

Revenue Sharing

The Branch was responsible for reviewing and updating the input into the equalization grant formula to ensure an equitable distribution of funds. The Branch determined the distribution of $12,773,157 unconditional revenue sharing funds to rural municipalities for the 1981-82 fiscal year.

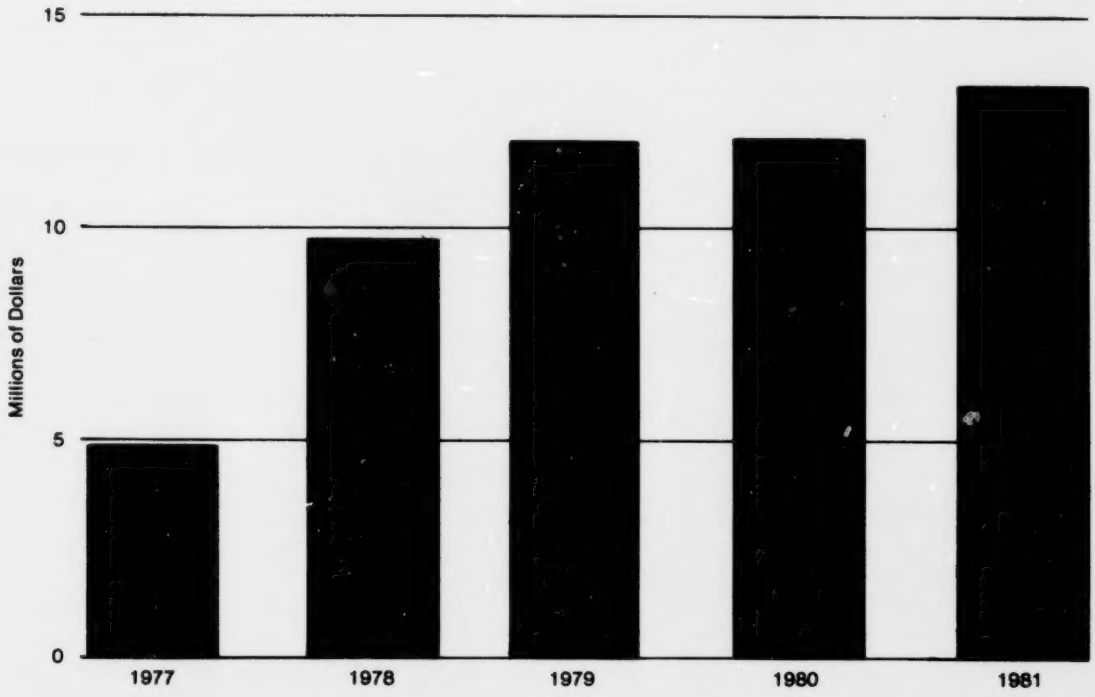
The Branch also determines the Main Farm Access construction assistance rate for each rural municipality. This rate forms the basis of provincial assistance for all our road assistance programs.

The Branch was responsible for the distribution of organized hamlet grants. For the 1981-82 fiscal year $577,730 was allocated to 136 hamlets.

The grant consists of a base amount and a per capita grant to assist small communities in providing services.

Unconditional Revenue Sharing Grants

(Including Organized Hamlets)



1978 was the first year for Revenue Sharing

Traffic Safety

The Rural Traffic Safety program began in 1977 and provides financial and technical assistance to rural municipalities for traffic improvements. To date 140 rural municipalities participated in this program.

A centreline striping program was initiated with the co-operation of the Department of Highways and Transportation whereby 50 km of surfaced grid road in eight rural municipalities was centre striped to improve traffic operation.

Through the "Traffic Accident Information System" this Branch, in conjunction with the district office staff, is able to monitor and analyze municipal road traffic accidents to identify and correct roadway deficiencies. Throughout the year, a number of recommendations were made to rural municipalities to improve potentially hazardous locations.

Year end accident information is forwarded to each rural municipality. This information enables rural municipalities to take corrective action and contribute to reducing the municipal accident rate and the economic loss. The economic loss due to property damage alone was $11.4 million in 1981.

Due to increases in the number of accidents on the municipal road system, the Branch has developed an expanded Traffic Safety Program which will provide assistance to rural municipalities for traffic safety counter-measures which include signing, clearing of sight triangles, centre striping and intersection improvements. This program will be implemented by April 1, 1982.

Signing

The Branch is responsible for developing and monitoring sign standards and specifications to ensure that municipal signing conforms to the Canadian standards. New signs and signing techniques and materials are evaluated and adopted for use on the municipal road system.

The Branch staff developed and planned the Primary Grid road numbering system whereby 8 000 kilometres of high volume municipal roads were identified with route numbers to improve municipal travel. This program was implemented officially on June 1, 1981 and was well received by all rural municipalities and the travelling public. These routes are now shown on the Grid Road and Highway maps.

Trends in Accident Rate by Road System

Ferry Services

Fifteen cable ferries were in operation during the 1981 ferry season, ten on the South Saskatchewan River, four on the North Saskatchewan River and one on the Saskatchewan River.

Ferry services commenced at the Riverhurst Ferry crossing on April 7 and continued until December 25. The Riverhurst Ferry operates across Lake Diefenbaker. On April 8 ferry service commenced on the North Saskatchewan River at the Wingard and Cecil Ferry crossings and on the South Saskatchewan River at the Weldon Ferry crossing. The Cumberland House Ferry crossing located on the Saskatchewan River commenced service on April 15 and continued until December 2.

The only remaining wood scow which was located at the Fenton Ferry crossing was replaced by a steel scow this season.

A ferry maintenance crew of seven was employed during the year to carry out all necessary construction and maintenance programs.

The total cost of operations, maintenance and improvements ending March 31, 1982 was $1,243,278.50.

Bridge Services

The Bridge Services Branch administers a program under which financial and technical assistance is provided to rural municipalities for the construction and repair of municipal bridges under their jurisdiction.

Technical assistance consists of carrying out inspections, engineering designs and providing recommendations on bridge problems.

Financial assistance is provided at rates varying from 20% to 80% for bridges from 6 metres to 30 metres in length. For bridges greater than 30 metres in length, financial assistance at the rate of 100% is provided on bridge construction and repair costs.

During the 1981-82 fiscal year, funding for the bridge program and project expenditures were the largest in the history of the program, with 2.7 million being expended. Financial assistance was provided to 79 rural municipalities. Approximately 74% of the total bridge expenditures were made for bridge projects on designated roads, such as primary grid, grid and main farm access roads. These projects were given priority because of the greater traffic volumes served and also to co-ordinate bridge construction with new road construction.

The replacement of larger substandard bridges was again given considerable emphasis as approximately 60% of the total expenditures were made on larger bridge projects with the Department paying 100% of the costs for these projects.

Under the direction of the Bridge Services Branch, construction and repair for the majority of municipal bridges was carried out by the bridge construction crews of Saskatchewan Highways. Culvert installations were carried out either with municipal equipment or by road construction contractors.

Because of the present economic advantage, the use of corrugated steel culverts in lieu of smaller bridges continued to be a popular choice, particularly in view of the new corrugation profiles that are available for helical corrugated steel culverts.

During the 1981-82 fiscal year, approximately 120 bridge inspections were carried out by the branch, with corresponding reports and recommendations being forwarded to the municipalities. In addition to the design of new drainage structures, work also included making arrangements to have new bridges constructed.

Inventory counts of the number of bridges were carried out in 16 municipalities with the objective of updating the rates for financial assistance on municipal bridge projects. Current bridge inventory information is important since the existing assistance formula is based on the number of 6 metre bridge units in a municipality in relation to the particular municipality's assessment.

The bridge projects receiving financial assistance during the 1981-82 fiscal year are summarized as follows:

Summary of Bridge Program

Construction — Larger Bridges (100% Funded)

Rural Municipality	Location	Description
White Valley #49	On a primary grid road on the outskirts of Eastend over the Frenchman River.	3 span bridge, 39 metres long, precast concrete superstructure.
Redburn #130	On a municipal road south of Pitman over the Moose Jaw River.	3 span bridge, 36 metres long, precast concrete superstructure.
Rocanville #151 and Spy Hill #152	On a municipal road southeast of Tantallon over the Qu'Appelle River.	3 span bridge, 39 metres long, precast concrete superstructure.
Cote #271	On a municipal road southeast of Kamsack over the Assiniboine River.	3 span bridge, 27 metres long, precast concrete superstructure.
Keys #303	On a main farm access road northeast of Canora over the Whitesand River.	5 span bridge, 63 metres long, precast concrete superstructure.
Harris #316	On a main farm access road northwest of Tessier over the Eagle Creek.	5 span bridge, 75 metres long, precast concrete superstructure.
Bjorkdale #426	On a grid road south of Steen over the Red Deer River.	3 span bridge ,36 metres long, precast concrete superstructure.
Cut Knife #439	On a regional park road northeast of Cut Knife over the Cut Knife Creek.	3 span bridge, 36 metres long, precast concrete superstructure.
Connaught #457	On a main farm access road northwest of New Osgood over the Leather River.	3 span bridge, 54 metres long, precast concrete superstructure.
Total — 9 Larger Bridges		

Construction — Standard Pile Bridges

Spans & Total Length	No. of Projects
1 span, 6 metres	5
1 span, 9 metres	2
1 span, 12 metres	2

Total — Large Culverts	**24**

Miscellaneous Bridge Projects

Description	No. of Projects
Small Culverts in lieu of bridges	20
Low Level Crossings	6
Bridge Widening and Raising	3
Bridge Extensions	1
Channel Improvements	1
Total Miscellaneous Projects	**31**

Financial assistance was also provided on the remaining costs for 5 larger bridges completed in 1980-81.

Road Services

The Road Services Branch of the Department of Rural Affairs provides technical and financial assistance to municipalities for the construction, oil surfacing and maintenance of designated roads according to their eligibility.

The designated road programs administered by the branch include the following:

Grid Roads — this program, consisting of an all-weather road system of inter-connecting municipal roads, initially began in 1956 with 19 000 km and later expanded to 26 000 km. Although construction was completed by April, 1976, maintenance assistance is provided.

Primary Grid Roads — this program began officially in 1977 and consists of 8 100 km of the more important grid and main farm access roads.

Main Farm Access Roads — this program began in 1967 as a secondary grid system to provide all-weather access roads to as many farm sites as possible.

Regional Park Roads — designated roads to regional parks are eligible for construction and oil surfacing assistance.

Oil and Industrial Access Roads — this program provides assistance for those roads carrying a large amount of traffic, associated with the oil or other industries.

Resort Roads — this program provides assistance for roads that carry a substantial amount of tourist traffic, particularly during the summer months.

Indian Reserve Roads — this program involves designated roads on Indian Reserves. Construction costs are shared between the federal and provincial governments.

Indian Reserve Access Roads — this program began in 1979 and provides assistance for construction of access roads to Indian Reserves.

Engineering services are available through six district offices located in North Battleford, Saskatoon, Prince Albert, Yorkton, Weyburn and Swift Current.

The activities for the fiscal year ending March 31, 1982 are being detailed on a regional basis, with each region consisting of two districts under the supervision of a Regional Engineer.

Engineering Services

Saskatoon District and North Battleford District

The north-west region includes the central part of Saskatchewan around Saskatoon, as well as the north-west area surrounding North Battleford.

The district offices in each of these two cities provide technical assistance to municipalities located in their area for the construction, oil surfacing and maintenance of designated roads.

The spring of 1981 was hot and dry, resulting in an early start for road construction. This dry weather prevailed throughout the season and little time was lost due to wet weather. As a result of these favourable conditions, nearly all proposed construction was completed with very little carry-over into 1982. Several municipalities took advantage of the dry conditions to construct additional mileage or complete projects through sloughs and wet areas.

Contractor interest and capabilities remained high in the region during the year, with each job advertised receiving several bids. The average bid prices in the Saskatoon and North Battleford districts were 72¢/m^3 and 77¢/m^3 respectively. These average bid prices were based on a total of 63 tender calls, with the lowest at 60¢/m^3 near Moose Jaw to a high of $1.00/$m^3$ in the north-west part of the region.

Grading costs varied considerably across the region, with a project in the R.M. of Maple Bush No. 224 at $9,800/km compared with a project in the R.M. of Frenchman Butte No. 501 at $29,900/km.

The Regional Engineer is responsible for reviewing and authorizing for payment all conditional grant applications in the region. This year, 1 201 km of construction accounts were processed in this office.

Construction

In the north-west region, 90 rural municipalities constructed a total of 535.8 km of road under the following programs: 136.4 km of primary grid, 361.6 km of main farm access, 26.8 km of industrial access, 9.5 km of resort and 1.5 km of Indian Reserve access.

A total of 75.9 km of grid, main farm access and regional park reconstruction was undertaken in 24 rural municipalities during the 1981-82 fiscal year.

Design and Engineering

The engineers and staff in the northwest region provided special engineering services to 90 out of a total of 107 rural municipalities and two urban centres. Complete design and final engineering services were provided to four rural municipalities on 3.6 km of construction. In addition, the North Battleford and Saskatoon district offices reviewed and approved 537.2 km of road designs as prepared by various consulting engineering firms practicing in the province.

Oil Surfacing

Oil surfacing was undertaken in four rural municipalities for a total of 32.0 km in 1981 under the following programs: primary grid, primary grid-regional park and regional park roads.

Oil surface maintenance was carried out in 14 rural municipalities on a total of 191.5 km of surfaced road.

Maintenance

Annual maintenance grants are paid to rural municipalities on grid, regional park, resort and industrial access roads provided the municipalities maintain a satisfactory level of maintenance throughout the year. This assistance is $70/km on those roads with traffic in excess of 150 vehicles per day and $60/km on the balance.

During the 1981-82 fiscal year, assistance was provided to 107 municipalities, 13 Indian Reserves and 65 urban municipalities on a total of 8 201 km.

Synopsis

The year was highlighted by the completion of sizeable grading and surfacing programs on the primary grid system. The Rural Municipality of St. Peter No. 369 completed 10.2 km of primary grid #756 at a cost of $113,600. The Town of Watrous and the Rural Municipalities of Morris No. 312 and Usborne No. 310 co-operated in constructing 7.4 km of primary grid between Watrous and Guernsey. The Rural Municipality of Eagle Creek No. 376 surfaced 9.0 km of primary grid #784 at a cost of $218,000.

Engineering Services

Swift Current District and Weyburn District

The two district offices of the southern region are located in Swift Current and Weyburn. The district staff provides technical assistance to the municipalities to facilitate the construction, oil surfacing and maintenance of designated roads throughout the 108 rural municipalities in the southern region.

The maintenance area concept was most readily accepted in the southern region and 27 active maintenance areas have been formed to date. The prime objective of the maintenance area is to ensure timely, adequate maintenance of the oil surfaced primary grid and regional park roads in the region.

Construction

The 1981 construction season could be classified as an average season. Most planned programs were completed with little or no carry-over necessary.

As a result of the great variation of topography throughout the area, the costs of construction varied accordingly. Excavation prices varied from a low of 58¢/m^3 in R.M. 63 to a high of 76¢/m^3 in R.M. 34. The average excavation price was 64¢/m^3. The grading costs were as low as $4,000/km in R.M. 32 to a high of $36,500/km in R.M. 44. The average cost per kilometre of main farm access in the southern region was $12,370 in 1981. Primary grid construction costs varied from $10,000/km to $21,200/km, with the average cost being $15,100/km.

During the 1981 season, there were 450.0 km of road constructed in 69 rural municipalities, of which main farm access roads accounted for 321.8 km. There were 105.4 km built on the primary grid system and 9.2 km of regional park road. The industrial access program resulted in 4.8 km of industrial access road construction and 8.8 km of oil access road. A total of 17 rural municipalities rebuilt 4.6 km of main farm access, 60.2 km of grid and 3.6 km of oil access roads. A highlight in the Swift Current district was the commencement of construction of an east-west main farm access road link in the Rural Municipality of Old Post No. 43 and the Rural Municipality of Waverley No. 44 between Primary Grid #608 and Canopus, Saskatchewan. The Rural Municipality of Waverley completed 9.8 km of the road link which contained 419 000 cubic metres of earthwork. The R.M. of Old Post completed an additional 10.2 km of their portion of the project, which required 190 000 cubic metres of earthwork. The R.M. of Old Post is contemplating the completion of another 10.2 km in the 1982 season. This all-weather road will provide a much shorter route for the residents travelling between Fir Mountain and Rockglen, Saskatchewan.

Design and Engineering

Engineering services were provided by Rural Affairs' staff in 80 rural municipalities and one town.

The staff was responsible for construction and final inspection in 95 municipalities. A total of 470 km of detailed designs were submitted by consulting engineers, to be checked and approved by our district staff.

Oil Surfacing

There were a total of 10 rural municipalities who surfaced 69.2 km of primary grid and regional park road in the southern region, consisting of 65.2 km of primary grid and 4.0 km of regional park.

The average cost of stabilization and oil surfacing in the southern region was $17,530/km in 1981.

An interesting surfacing project was an 8.7 km project south of Rockglen, Saskatchewan. The surfacing was carried out by the Borderland Maintenance Area in the R.M. of Poplar Valley No. 12.

Changes in terrain and soil conditions warranted the division of the project to accommodate two different methods of subgrade preparation. A 7.6 m width of driving surface and a 40 mm depth of oil surface mat was constructed using SC 500 on 6.4 km of sandy subgrade. Tight blading and minimal compaction was all the preparation deemed necessary and the subgrade did not require stabilization. Due to a change in soil conditions and a steep grade, the remaining 2.3 km of subgrade was scarified to a depth of 10 cm and stabilized. A seal coat using HF 350 S emulsion was then applied to protect the base. This type of oil surfacing provides a surface with high skid resistance which will ensure maximum safety on the steep grade. The municipality will be applying a second seal coat in 1982.

Maintenance

The Department of Rural Affairs provided financial assistance to 108 rural municipalities, two Indian Reserves and 63 towns and villages on a total of 8 678 km of primary grid, grid road, regional park roads, resort roads and industrial access roads throughout the southern region.

Synopsis

The municipalities in the southern region submitted accounts for construction, oil surfacing, oil surface maintenance and gravelling on 2 029 km of road. These accounts were perused, verified and authorized for payment by the Regional Engineer.

Engineering Services

Yorkton District and Prince Albert District

The north-east region is made up of 84 rural municipalities, with district offices located in the cities of Yorkton and Prince Albert. The engineering staff in the region provide technical assistance to municipalities for the construction, oil surfacing and maintenance of the designated road programs. The early, dry spring of 1981 with below normal runoff in the region promoted an early start on grading projects in both the Prince Albert and Yorkton districts. Good weather prevailed throughout the entire construction season resulting in a very productive construction year. Most contractors completed their season's work prior to freeze-up.

Grading costs varied greatly throughout the region, with the cost of excavation varying in price from 59¢/m^3 in one municipality in the south to 90¢/m^3 in the Canwood-Big River area and as high as 98¢/m^3 in the Carrot River district. Generally, the average prices were in the order of 77¢/m^3 to 83¢/m^3, which resulted in grading costs of approximately $13,000/km to $14,000/km. However, construction costs did vary from as low as $9,300/km to a maximum of $38,000/km.

There are 13 active maintenance areas in the north-east region. These maintenance areas were formed to encourage co-operation in the maintenance of oil surfaced primary grid and regional park roads. In the 13 maintenance areas, 16 rural municipalities and two towns were actively engaged in the construction of primary grid roads, oil surfacing or oil surfacing maintenance.

The regional engineer is responsible for scrutinizing and authorizing for payment of all conditional grant applications in the region. This year, 1 423 km of road construction accounts were processed in this office. In addition to these, accounts were processed for maintenance, traffic safety and reconstruction projects.

Construction

In the north-east region, 73 rural municipalities constructed 437.9 km of designated road, of which 365.0 km were in the main farm access and 43.9 km in the primary grid systems. The remainder of the construction was carried under special programs, with 12.7 km constructed in regional parks, 6.4 km in the resort road program and 10.0 km in the Indian Reserve access system. In addition, 46.5 km of grid and main farm access roads were reconstructed in 10 rural municipalities.

Our staff provided engineering alignment surveys in 71 rural municipalities and three Indian Reserves and carried out construction inspections in the 79 rural municipalities, two villages and two Indian Reserves.

The highlight for 1981 was the undertaking of construction of the Qu'Appelle Valley scenic route from Tantallon to Highway #9 for a total length of 32 km. This resort road is a joint project between the Qu'Appelle Valley Implementation Board, the Department of Rural Affairs and two rural municipalities. The total estimated cost for the 32 km is $780,000. The Qu'Appelle Valley Implementation Board will provide assistance of 60% of the total project cost, with the Department of Rural Affairs and the two rural municipalities sharing the remainder of the cost according to the resort road assistance policy. In 1981 the entire alignment and design was undertaken and completed with 8.6 km of the project constructed at a cost of $173,000.

Oil surfacing was undertaken in three municipalities and one town, with 2.4 km oil surfaced in the primary grid program and 8.5 km in the regional park program. These surfacing projects were located in both the Yorkton and Prince Albert districts. On each of the surfacing projects, a 7.6 m driving width was provided with an oil surface mat approximately 35 mm in thickness. On 8.4 km, the oil surface mat was constructed on a 30 mm to 50 mm depth of salt stabilized base. With proper maintenance, these projects should provide these areas with an economical dust-free driving surface for many years to come. The average cost of oil surfacing in the north-east region was $25,000/km.

Design

Our district engineering staff were requested to check, recommend and approve designs submitted by consulting engineers on 504.3 km of proposed road construction projects in this region. They were also called upon to provide complete engineering on 8.5 km of primary grid and main farm access road.

Maintenance

In order to assess the municipalities' eligibility for normal maintenance grants, our staff inspected 7 751 km of grid and regional park roads, resort roads and industrial access roads. These inspections were carried out in 83 municipalities, 32 Indian Reserves and 54 towns and villages. Oil surface maintenance was undertaken in four rural municipalities and three villages, with 23.0 km of surfaced roads being repaired or seal-coated.

Department of Rural Affairs Annual Construction, All Programs

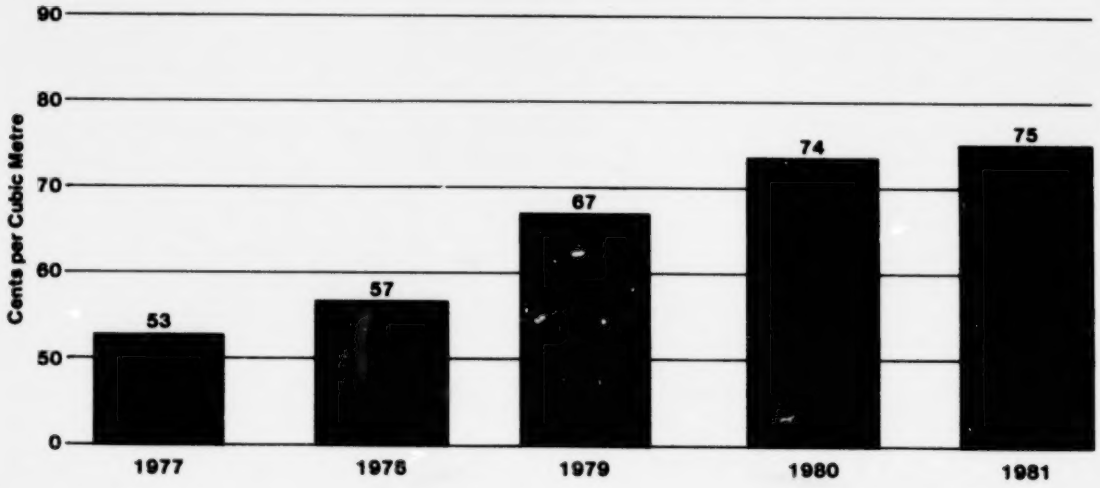
Unit Bid Prices for Earth Excavations



Rural Affairs 1981 Grant Structure For Designated Roads

Type of Road	Construction	Extra Assistance	Maintenance Assistance	Reconstruction Assistance	Oil Surfacing Assistance	Remarks
Grid	Grid construction program discontinued as of April 1, 1976	N/A	Maximum of $60.00 per km divided between surface maintenance and right-of-way maintenance. $70.00 per km on designated locations where traffic exceeds 150 v.p.d. Maintenance grants paid on field reports. Accounts not required.	Basic main farm access percentage. Grant earned forms part of M.F.A. and primary grid construction allotment.	N/A	
Main Farm Access	Basic main farm access percentage. Based on equalization grant formulae. Varies from 40% to 60%.	Normal main farm access percentage. – Extra 15% on costs over $3,000 per km. – Extra 10% on costs over $6,000 per km.	N/A	Basic main farm access percentage. Grant earned forms part of M.F.A. and primary grid construction allotment.	N/A	Basic percentage may vary from year to year.
Primary Grid	Varies from 40% to 70%. Main farm access percentage for individual R.M. Main farm access percentages of individual municipalities within the 'Area', plus 10%. Assistance available only for construction to Primary Grid standards.	Extra 15% on costs over $9,000 per km.	For subgrade and right-of-way maintenance, it is the same as 'Grid'. 50% assistance for oil surface maintenance and R.M. must be in a 'Maintenance Area'.	(Same as under 'Construction' and 'Extra Assistance'). Grant earned forms part of M.F.A. and primary grid construction allotment.	(Same as under 'Construction' and 'Extra Assistance'). R.M. must be in a 'Maintenance Area'.	
Roads on Indian Reserves	Rural Affairs pays 100% of initial construction and gravel. Province reimbursed 80%. Applies to main farm access, primary grid and resort.	N/A	For sub-grade and right-of-way maintenance, it is the same as 'Grid'. 50% assistance for oil surface maintenance on 'Primary Grid' and I.R. must co-operate with R.M. in 'Maintenance Area'. Regravel assistance – same as construction.	(Same as under 'Construction').	Primary Grid only (Same as R.M.). (I.R. must co-operate with R.M. in 'Maintenance Area'.)	Grant earned does not form part of M.F.A. construction allotment.
Access Roads to Indian Reserves	80% assistance of initial construction and gravel.	N/A	N/A	N/A	N/A	Grant earned does not form part of M.F.A. construction allotment.
Towns and Villages	70% assistance for all designated roads.	N/A	(Same as Grid) No assistance for M.F.A.	(Same as under 'Construction')	Primary grid and regional park access only. (Same as under 'Construction') Towns and Villages must co-operate with R.M. in 'Maintenance Area'.	

Rural Affairs 1981 Grant Structure For Designated Roads

Type of Road	Construction	Extra Assistance	Maintenance Assistance	Reconstruction Assistance	Oil Surfacing Assistance	Remarks
Industrial Access (Includes Oil Access)	Basic main farm access percentage.	– Plus 20%. – Extra 15% on costs over $3,000 per km. – Extra 10% on costs over $6,000 per km. – Maximum Rural Affairs share 80%.	(Same as Grid)	Basic main farm access percentage, plus 20%.	N/A	Grant earned does not form part of M.F.A. construction allotment.
Resort Roads	Basic main farm access percentage.	– Plus 15%. – Extra 15% on costs over $3,000 per km. – Extra 10% on costs over $6,000 per km. – Maximum Rural Affairs share 90%.	(Same as Grid)	(Same as under 'Construction' and 'Extra Assistance').	N/A	Grant earned does not form part of M.F.A. construction allotment.
Regional Park Access Roads	Basic main farm access percentage.	– Plus 30%. – Extra 15% on costs over $3,000 per km. – Extra 10% on costs over $6,000 per km. – Maximum Rural Affairs share 90%.	(Same as Grid for sub-grade and right-of-way). 50% assistance for the maintenance of oil surface. (R.M. must be in a 'Maintenance Area').	(Same as under 'Construction and 'Extra Assistance'.)	(Same as under 'Construction and 'Extra Assistance'). (R.M. must be in a 'Maintenance Area').	Grant earned does not form part of M.F.A. construction allotment.
Bridges	– Bridges over 30.5 metres in length: 100%. – Bridges 6.1 metres to 30.5 metres in length: Standard bridge assistance rate from 20% to 80% determined from formula based on number of bridge units and assessment. (e.g.) 20% = assess of $384,000/unit or greater. For bridges on grid and main farm access, assistance at the higher of standard bridge rate or appropriate main farm access rate.	N/A	– Bridges over 30.5 metres in length: 100%. – Bridges 6.1 metres to 30.5 metres in length: R.M. pays first $200.00. Assistance on balance of costs at standard bridge assistance rate. For bridges on grid and main farm access, assistance at the higher of the standard bridge rate or appropriate main farm access rate.	N/A	N/A	Bridges 24.4 metres to 30.5 metres are eligible for extra construction assistance.

Municipal Management and Finance

The main function of the Branch is to provide consultative and review services to elected and appointed rural municipal officials in all aspects of municipal law, administration and accounting.

These services are provided by mail, telephone and during periodic visits to municipal offices, during which time municipal records are inspected. Specific problems and alleged improper conduct of municipal operations are investigated. A report on each visit is subsequently prepared for submission to the Minister and to the Reeve of the rural municipality. The report indicates any deficiencies identified, possible ramifications of such deficiencies and recommends remedial procedures to improve municipal administration.

During the year, detailed reviews of the records maintained by twenty-four secretary-treasurers applying for a Class "A" or Superior "A" Certificate of Qualification were conducted for the Board of Examiners. Members of the branch also conducted 101 routine reviews of municipal records and made 158 advisory calls at municipal offices. Forty-two special interviews were conducted with municipal officials and twenty-four council meetings were attended. Staff members expended fifty-three days attending conventions of the S.A.R.M. and the R.M.S.T.A.

Grants totalling $57,500 to municipalities for sixteen trainees enrolled in The Municipal On-The-Job Training Program were processed as were the municipal bylaws and tax cancellations submitted for Ministerial Approval. Fidelity bonds for all rural municipal treasurers were monitored. The Supervisor of Boundaries processed Orders for 21 Organized Hamlets and 1 changed in Rural Municipal Boundaries.

The Director, as the departmental legislative officer, prepared and processed necessary legislative and regulatory amendments.

Where rural municipalities are unable to obtain the services of qualified secretary-treasurers, the branch reviews each application and makes recommendations concerning the issue of permits to those rural municipalities employing unqualified persons as secretary-treasurer.

Annual financial statements, submitted by municipal auditors, and other financial reports for all 299 rural municipalities are monitored to evaluate financial strength, identify statutory and administrative deficiencies and determine where assistance is required to ensure adequate financing of municipal programs. Information obtained from these sources is compiled for report to Statistics Canada.

The following statistical schedules have been prepared from the information contained in the 1980 financial statements of rural municipalities.

Revenues for Rural Municipalities

Fiscal Services	16,847,960	15,480,678	13,871,426	13,106,594
Total	**104,882,837**	**95,693,872**	**81,847,886**	**71,988,858**
Net Surplus for the Year	**2,877,976**	**2,289,706**	**2,831,011**	**3,726,137**

Revenues and Expenditures

General revenues and expenditures increased in 1980. The total combined revenues of all rural municipalities for the year 1980 exceeded the combined expenditures by 2,877,976 dollars. The provision for reserves for future expenditures and deficits from previous years were more than the transfers from surplus and reserves by $477,157. The real operating surplus is, therefore $3,355,133.

Total	**57,337,110**	**54,028,785**	**49,570,509**	**45,962,659**

Assets and Liabilities

The liquid financial position, which indicates the ability to meet current financial obligations of the revenue fund was strengthened during the year. One Hundred and Ninety four of the rural municipalities had an operating surplus for the year and the operation of 105 rural municipalities resulted in a deficit. Reserves and surpluses continue to be maintained at an adequate level.

Saskatchewan Rural Affairs appreciates the continued cooperation and assistance received from local authorities, including the appointed municipal secretary-treasurers in dealing with municipal problems and supplying information for this segment of the annual report.
